

RIVERS AND FLOODS.

By H. C. FRANKENFIELD, Professor in Charge, River and Flood Division.

There were no floods of consequence during the month except in the Grand River of Colorado and its tributaries, the Colorado River of Arizona, and in the Rio Grande. These floods were serious in character, and detailed reports regarding them will be found in the appropriate section of this Review.

There were moderate floods in the Connecticut, Pedee, Wateree, Oconee, Ocmulgee, and Neosho Rivers, but the resulting damage was small. The usual warnings were issued for all the floods.

Hydrographs for typical points on several principal rivers are shown on Chart I. The stations selected for charting are Keokuk, St. Louis, Memphis, Vicksburg, and New Orleans, on the Mississippi; Cincinnati and Cairo, on the Ohio; Nashville, on the Cumberland; Johnsonville, on the Tennessee; Kansas City, on the Missouri; Little Rock, on the Arkansas; and Shreveport, on the Red.
